### Objectives and Motivation

This special session (named SS-AIE) will bring together brilliant engineers from academics and industrial background to exchange ideas for development and advancement of intelligent systems and cognitive science approaches for educational computing applications.

### Scope and Interests

SS-AIE solicits empirical and theoretical papers particularly (but not exclusively) in the following lines of research and application:

1. Learning contexts and informal learning
2. Representing and analyzing activity flow and discourse during learning.
3. Modelling learner & motivation, metacognition, and affective aspects of learning.
4. Scaling up and large-scale deployment of “artificial intelligent in education” systems.
5. Design and formative studies of “artificial intelligent in education” systems.
6. Domain-specific learning applications
7. Educational games and gamification
8. Studies on human learning, cognition, affect, motivation, and attitudes.
9. Models of teaching and learning
10. Intelligent and interactive technologies in an educational context.
